## PREFACE.

---

Prefatory remarks in works of this description are almost superfluous. Their utility and convenience is generally conceded and admitted. This little volume is intended to cover a new field and to supply the deficiency of a *compact, reliable, and cheap* business guide to the great Commercial Emporium of the Pacific. No efforts or expense have been spared to render it well worth the low price at which we sell it. It will be found very useful to the country as well as the city merchant, tradesman or professionalist. In the compilation of this work we have adopted the plan of *relative location*, which in many respects, and more especially to strangers, will be found more readily than the present complicated system of re-numbering the streets which is in course of progression. In conclusion we would return our sincere thanks for the very liberal manner in which our advertising department has been sustained by our merchants and manufacturers.

DAVID M. GAZLAY.

## TO THE PUBLIC.

In the preparation of the present volume I have freely availed myself of the arrangement and information contained in the *Business Guide of the SAN FRANCISCO DIRECTORY* for 1860-61, published in July last. In justice to Mr. HENRY G. LANGLEY, the compiler of that work, I deem this acknowledgment necessary for the liberty taken with his property.

# STOVES AND CASTINGS

MANUFACTURED BY THE

BARSTOW

STOVE COMPANY

PROVIDENCE, R. I.

---

## THE BAY STATE COOKING STOVE!

This Stove was brought out in 1848, and is too well known as a FIRST CLASS STOVE, to require much commendation. No better evidence of its superiority need be adduced, than the fact that many imitations of it have appeared from other Foundries, in many of the New England, Middle and Western States.

The No. 5 is finely adapted to small hotels, large boarding houses, bakeries, etc., having four nine inch and two ten inch boiler holes. Roasting can be performed in the most perfect manner in front of the Stove, the arrangement for this being very complete. All the sizes except No. 5 can be used for coal.
